

IM 2007

Moving from Bits to Business Value

21-25 May 2007
Munich, Germany

10th IFIP/IEEE Symposium on Integrated Management

2nd time outside USA

<http://www.ieee-im.org/>

The **10th IFIP/IEEE International Symposium on Integrated Network Management (IM 2007)** will be held 21-25 May 2007 in Munich, Germany. IM 2007 will present the latest technical advances in the area of management, operations and control of networks, networking services, networked applications, and distributed systems. Held in odd-numbered years since 1989 and taking turns with its sibling conference NOMS, IM 2007 will build on the successes of its predecessors and serve as the primary forum for exchange among the research, standards, vendor and user communities in the field of integrated management. The symposium is sponsored by the International Federation for Information Processing (IFIP) Working Group 6.6 on Management of Networks and Distributed Systems, and by the IEEE Communications Society Technical Committee on Network Operations and Management (CNOM).

The main topics of IM 2007 include:

Technical Sessions:

- * Monitoring, Management of High-speed Networks
- * Virtualization, Self-Management
- * Security Management, Analysis and Enforcement
- * Workload Management, Measurements and QoS
- * Change and Configuration Management
- * SOA Management, Service Management
- * Policy Management, Business-Driven Management
- * Mobility Management

Application Sessions:

- * Management solutions for network operators
- * Managing authentication, authorization, identities and access control
- * Managing upcoming systems and infrastructures
- * Network and service analysis and optimization
- * Management infrastructure development

Panel Sessions:

- * Techniques for Policy Refinement
- * Integrating Application Development and Operational management
- * Can Management Systems be Trusted?
- * Virtual Machine Management
- * What's IT management worth to the business?

IM 2007 will be organized into technical and application sessions, panels, and tutorials. In addition, it will feature an industrial experience track to share practical lessons learned by user and vendor communities, birds-of-a-feather sessions, and vendor exhibits. In the tradition of previous events, we strive to make the IM 2007 Symposium the highest quality professional event of the year. Paper submissions underwent a stringent review process implemented by the Technical Program Committee, which includes many of the most respected experts in the field. We received papers that break new grounds or present insightful results based on experience with integrated management of networks, systems, applications and services. Six workshops on specialized topics will be held on the days before and after the IM technical program.

Keynotes by

State Minister Erwin Huber
Bavarian Minister of Economic Affairs, Infrastructure, Transport and Technology

Ulrich Pfeiffer
Regional CTO, Software Global Business Unit, HP

Prof. Dr. Wolfgang Gentsch
Coordinator of the German D-Grid Initiative

Prof. Vasilis Maglaris, Ph.D.
Chairman of the GÉANT2 National Research and Education Networks Policy Committee, NTUA Athens

Keith C. Goodman
IBM Distinguished Engineer and CTO for IT Strategy and Architecture Services

Dr. René Wies
BMW Group, Vice President, Head of IT for BMW's Engineering and Purchasing Division

Registration
